A plan favorite for good reason! The openness of the great room, kitchen and dining nook make this a spacious gathering place. The gas fireplace in the great room with floor to ceiling stacked stone and a stained box mantel creates an alluring focal point. Beautiful wrought iron stair spindles, quartz countertops, pendant lighting, stainless-steel KitchenAid appliances, under-cabinet lighting, and 8' interior doors on the main level add to the many desirable finishes in this home. The primary bedroom adjoins a luxurious bath with a large soaking tub, walk-in shower, and double vanity with quartz counter tops. The basement with 9' foundation walls includes a rec room with wet bar that's perfect for game nights. The covered back patio is a great all-weather retreat and has an installed gas line to make grilling a breeze! With the oversized 3-car garage there's lots of space for larger vehicles or toys. **The Kirkland Plan, Note: photos are of the plan and not this specific home.**
